Md Safiqul Islam Nasim

Junior Software Engineer

mdsafiqulislamnasim1234@gmail.com 01931802944 Dhaka Nasim Nasim Portfolio

CAREER OBJECTIVE

Backend Software Engineer with close to 2 years of experience building and optimizing RESTful APIs in Laravel, including role-based access control, JWT authentication, and database performance tuning. Delivered backend systems and admin dashboards supporting 1,000+ active users. Strong problem-solving foundation with 2,400+ algorithmic problems solved and 340+ programming contests, including a Codeforces Pupil rating. Looking for a Backend/Software Engineer role focused on building scalable, well-structured server-side systems.

TECHNICAL EXPERIENCE

CodeWare Limited, *Junior Software Engineer* 05/2025 – Present

- Independently built and led the backend (Laravel/MySQL) for a Medical University IRB (Institutional Review Board) management system used by 1,000+ users.
- Contributed to the backend (Laravel/MySQL) of a bus ticketing system deployed across 20+ countries, serving nearly 1 million users.
- Designed a Laravel-based RBAC system with JWT authentication, managing permissions for 500+ users
- Built admin dashboards using Filament and optimized database queries, improving task management efficiency by 40% and reducing API response time by 35%

Softvence, *Junior Laravel Developer* 10/2024 – 05/2025

- Built a scalable RESTful API in Laravel 9 to power an Android application used by 1,000+ active users.
- Implemented real-time chat functionality and a notification queue system for the application.
- Developed an admin dashboard with approval workflows, cutting task processing time by 50%.
- Designed a real-time leaderboard system and player task-tracking modules.
- Optimized MySQL queries, improving database performance by 40%.

PROJECTS

Beestera App, *Android App*
- Developed scalable RESTful API for Android application using Laravel with secure authentication and authorization
- Built admin dashboard with task approval workflows, leaderboard system, and player task management modules
- Optimized MySQL queries improving database performance and response times
Technologies : Laravel , MySQL

Hotel Management System, *Desktop App*
- Developed desktop application with user authentication and role-based access control
- Implemented CRUD operations for employee management and hotel car booking system
- Designed MySQL database schema supporting 100+ concurrent users
Technologies : Java, Java Swing, MySQL

TECHNICAL SKILLS

Languages: PHP, Java, C++, Python
Backend & Frameworks: Laravel, RESTful API Design
Databases: MySQL, PostgreSQL, Firebase
Tools & Platforms: Git, GitHub, Bitbucket, Jira, Postman
Core Concepts: Data Structures & Algorithms, OOP, RBAC, JWT Authentication
Working Knowledge (Studied/Practiced): Spring Boot, HTML, CSS, TypeScript, React.js, Angular, Kotlin, Flutter

PROBLEM SOLVING

- Solved 2400+ algorithmic problems across multiple platforms
- Participated in 340+ online and offline programming contests
- Codeforces: 1350+ | Codeshef: 140+ | UVa: 290 problems | Beecrowd: 262 problems
- LeetCode: 260+ problems | HackerRank: 200+ problems

EDUCATION

Daffodil International University, *BSc in Computer Science and Engineering,* 06/2019 – 07/2023 | Dhaka, Bangladesh

Bangladesh Navy College, *Higher Secondary School Certificate* 2016 – 2018 | Dhaka , Bangladesh

ACHIEVEMENT

- 2400+ problems solved | 340+ contests participated - Codeforces: Pupil (Max 1218) | CodeChef: 3-Star (Max 1736) - Rankings: 12th DIU Take-off | 8th DIU Intersection | 428th Asia Dhaka Regional 2021 - Problem Setter & Judge for DIU contests (2022-2023) - Programming Trainer at DIU
